

Ankit Karki

Backend Developer

+9779745941262 | ankitkarki8088@gmail.com | meenfa.tech | GitHub | LinkedIn

Objective

Backend developer with around 2 years of experience in Python and Django, building RESTful APIs and scalable backend systems. Skilled in backend development, database design, authentication systems, and API integration.

Experience

Vasuki Tech

Oct. 2025 – Present

Django Developer

Biratnagar, Nepal (Remote)

- Developed scalable backend systems and RESTful APIs using Django and Django REST Framework (DRF)
- Designed and optimized PostgreSQL database schemas, queries, and backend workflows for performance and reliability
- Implemented JWT-based authentication, authorization, and secure API access control
- Integrated backend services with frontend applications and mobile-friendly APIs
- Worked with Docker, Redis, and Celery for containerized development and asynchronous task processing
- Collaborated with frontend developers to deliver clean and maintainable API integrations

NepBigyan

Nov. 2024 – Sept. 2025

Backend Developer

Kathmandu, Nepal

- Worked on backend modules for a College Management System including authentication and role-based access
- Built and maintained RESTful APIs using Django and DRF for React.js frontend integration
- Improved existing backend systems by optimizing queries, fixing bugs, and enhancing performance
- Worked with relational databases and contributed to backend logic and data handling
- Collaborated with team members using Git and participated in debugging and feature improvements

Projects

Learning Management System | Full Stack (Django REST + React.js + PostgreSQL) | [GitHub](#)

- Built a full-stack LMS with course management, JWT authentication, and Khalti payment integration
- Developed RESTful APIs for course enrollment, assessments, and learning workflows using DRF
- Designed responsive frontend interfaces using React.js, Tailwind CSS, and Shadcn UI
- Worked with PostgreSQL for structured data management and backend operations

Postbox (Social App) | Django + Channels | [GitHub](#)

- Built a social platform with posts, likes, comments, and real-time messaging features
- Implemented WebSocket-based real-time chat functionality using Django Channels
- Developed backend logic, authentication flows, and server-rendered UI using Django templates
- Managed relational data handling and API workflows for social interactions

Team Up (Community Event Platform) | Django REST + Next.js + Docker + Redis + PostgreSQL | [GitHub](#)

- Developed backend APIs for a community event platform enabling users to create, discover, and join activities
- Implemented Google OAuth, JWT authentication, profile management, and participation workflows using DRF
- Integrated Redis, Celery, and Docker for asynchronous processing and containerized backend development
- Developed frontend interfaces and API integration using Next.js

Skills

Languages: Python, JavaScript, PHP, C

Backend: Django, Django REST Framework (DRF), Laravel, REST APIs, JWT Authentication, Redis, Celery

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite, MongoDB

AI / LLM: OpenAI, Claude, Gemini, Groq, DeepSeek

DevOps: Git, Docker, Vercel, Cloudflare, Postman

Core Skills: Backend Development, Database Design, API Integration, SQL, Query Optimization

EDUCATION

Ratna RajyaLaxmi Campus | Tribhuvan University

2025

Bachelor of Computer Application (BCA) | GPA: 3.36/4.0

Kathmandu, Nepal
